## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-8 and 16-21 have been allowed.

### ***Reasons for Allowance***

2. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach or suggest each and every feature of the present invention for "an apparatus comprising circuitry capable of determining if a device emits electromagnetic interference (EMI) in one or more regions of an electromagnetic spectrum occupied by other users; and if it is determined that the device emits EMI in the one or more regions of an electromagnetic spectrum occupied by other users, the circuitry additionally capable of: reducing the EMI in the one or more regions; and increasing the EMI in one or more other regions of the electromagnetic spectrum unoccupied by the other users" as in claim 16 and its corresponding method claim 1. The combination of Kerpez and Otten do not teach or suggest all of the claim limitations as pointed out by the applicants (Remarks, pp 5-8).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
